Jacob Dineen

Contact Information	iacob[dot]dineen[at]asu[dot]edu	AI, Reasoning and Cognition (ARC) Lab	(480)603-6994	jacobdineen.com	
Research Interests	I focus on reasoning and alignment in large language models (LLMs), with complementary interests in explainable AI (XAI), graph machine learning, and game theory. My research develops grounded yet practical AI solutions that enhance decision-making processes and address real-world challenges through improved model interpretability and AI alignment.				
Education	Arizona State University Ph.D. in Artificial Intelligence Advisor: Prof. Ben Zhou	e (GPA: 4.00/4.00)		2022-2027 (expected)	
	University of Virginia M.Sc. in Computer Science (GPA: 3.96/4.00) Advisor: Prof. Madhav Marathe			2019-2021	
	Syracuse University M.S. in Data Science (GPA: 4.00/4.00)			2017-2018	
	Grand Canyon University B.S. Finance and Economics	(GPA: 3.65/4.00)		2012-2015	
Research	Research Assistant @ Arizona State University • (Current) LLM Research @ AI, Reasoning & Cognition (ARC) Lab • (Previously) Cybersecurity Research @ SEFCOM		Present		
	 Applied Research @ Capital One Explored aspects of organization dynamics under a reinforcement learning setting. Implemented an agent-based modeling system to study managerial incentive structures on experimental program optimization. 				
	Research Assistant @ the University of Virginia Worked in the Biocomplexity Institute and Initiative labs with a focus on graph dynam systems and cooperative game theory/behavior modeling, under the supervision of Professor Madhav Marathe.

 Machine Learning Engineer @ Spring Oaks Capital Developed and deployed scalable ETL and modeling pipelines using Airflow and Kubernetes for text/call efforts and offer generation, incorporating ranking recommendation and constrained optimization solutions to scheduling problems. Implemented robust CI/CD processes including tests, automated builds, and deployments utilizing AWS ECR, CodeBuild, and GitHub Actions, ensuring seamless and efficient workflow. Assisted wrt to cloud infrastructure for the core technology stack, from containerization to resource provisioning and development environments, optimizing performance and scalability. Prepared and maintained comprehensive Sigma dashboards and Streamlit apps to monitor online performance metrics, providing key stakeholders with actionable insights and facilitating data-driven decision-making. 	<i>'22-'25</i>
 Engineered and productionalized critical updates to the core codebase, impacting 30MM+ users, through advanced feature engineering, robust data pipelines, unit tests, and custom model architectures. Developed sequential recommendation POCs utilizing PyTorch, Huggingface, and Nvidia's Merlin/Transformers4Rec. These innovations were showcased at the Nvidia GTC Fall Summit 2022. Co-led and designed a bi-weekly lecture series on Deep Learning and Neural Recommendation, fostering knowledge sharing and upskilling within the team. 	'21–'22
 Ph.D. Internships @ Capital One (2X Data Science, 1X Applied Research) Researched and implemented state-of-the-art neural recommendation solutions for ad tech challenges, significantly improving ad targeting and engagement. Developed scalable and extensible data pipelines in PySpark, leveraging novel data sources to enhance model performance and insights. Provided strategic insights and recommendations for integrating neural solutions into production environments, extending the impact of summer projects. Conducted advanced research in agent-based modeling and reinforcement learning, contributing to the Center for Machine Learning (C4ML). 	'20- '21
 Analyst and Business Intelligence @ Real World Marketing Designed and automated interactive dashboards and ad hoc reports, driving data-driven decision-making and improving operational efficiency. Integrated and analyzed diverse data sources, using statistical techniques to uncover actionable insights and optimize marketing strategies. Conducted multivariate analysis and A/B testing, significantly improving site conversion rates and marketing ROI. 	'16-'19
 Data Scientist @ Buffalo Check LLC Cofounded and scaled a successful LLC, delivering innovative advertising solutions to the US military and generating over \$2M in revenue. Performed detailed quantitative analysis on user engagement, enhancing advertising effectiveness and client satisfaction. 	'15-'19

Professional Experience Optimization Analyst @ Voltari

Conducted analysis centered around first and second-click ad performance. Analysis concerning pricing strategy/optimization. Managed point of interest (POI) database via SQL.

Graduate Courses	Knowledge Representation, Computer Systems Security, Software Security, Planning and Learning Methods in AI, Algorithms & Research/Dissertation Hours					
		Algorithms, Machine Learning, Computer Vision, Formal Methods, Reinforcement Learning, Graph Mining, Learning Theory (Game Theory), Cloud Computing & Research Hours				
	Analytics, Advanced Inf	Sion Making, Business Analytics, Financial Analytics, Marketing formation Systems, Data Science, Data Warehousing, Text Mining, vsis, and Information Policy				
Skills	OS	Linux (Ubuntu), MacOS, Windows				
	Language	Python, Rust, x86-64, Java, JS, R, C, C++, PRISM, Bash, Vue, React				
	Database	MySQL, SQLite, NoSQL, MongoDB, Snowflake, Redshift, Postgres, Redis				
	Markup	LaTex, HTML				
	ML Library	PyTorch, Keras, Tensorflow, Jax, Numpy, Pandas, Polars, Dask, NLTK, Networkx, SparkML, SnowparkML, DeepGraphLibrary, HuggingFace, Botorch, Torch Geometric, Burn, TRL, vllm, VeRL				
	Other	Weka, Mallet, Conda/Mamba, VSCode, Git, Databricks, Docker, Snowflake Sno Airflow, AWS (ECR/S3/EKS/Codebuild), Kubernetes, Helm, Sigma, Sagemaker OR-Tools, Click, Streamlit				
Misc.	Expert AI Trainer	pareto.ai ('24-present)				
	Tutor/TA	CGCC Calculus and Linear Algebra Tutor ('19) ASU CSE365 (pwncollege) TA				
	Conference Reviewer	HICSS, SBP-BRiMS, NAACL, EMNLP				
	Cyber Security (Certificate)	Pwn.college green belt (user: jdin) ('22). Reverse engineering, binary exploitation, dynamic and static analysis
